SUMMARY

QA Engineer with 2+ years of hands-on experience testing web, mobile, console, and VR applications. At Keywords Studios, responsible for end-to-end QA for live products — writing test plans, running regression and integration cycles, triaging defects with developers, and validating releases across multiple environments. Comfortable with both manual testing and Java-based automation (Selenium/TestNG), and experienced using Postman, JIRA, Sentry, and BI tools to investigate and communicate quality issues.

EXPERIENCE

Quality Assurance Engineer

April 2025 – Present

Keywords Studios — Gurugram, India

- Own QA across 4+ environments — **Dev, QA, Staging, Platform, and Production** — executing test plans covering functional, integration, regression, and system testing for web, mobile, console, and VR applications.
- Led end-to-end testing of multiple modules of an **Admin Tool** web application, ensuring changes were accurately reflected across **macOS (iMac Pro)**, Android, and iOS devices with different screen resolutions through cross-platform and responsive UI testing.
- Built and maintain a **Java (Selenium + TestNG)** automation suite that cut repetitive regression cycles, freeing up manual testing time for exploratory and edge-case coverage.
- Perform **API and backend workflow testing** using Postman to verify request flows, data consistency, and third-party integrations.
- Identified and triaged **50+ critical defects**, ran root cause analysis, and worked directly with developers to unblock releases — served as the primary QA point of contact for client issue resolution.
- Use **Sentry, Apache Superset, and BI event tracking** to investigate production issues and validate analytics data across environments.
- Validated **LTR/RTL layout consistency and cross-locales rendering** across Android and iOS devices with multiple screen resolutions, ensuring UI integrity across different language and regional configurations.
- Mentored QA interns on defect reporting standards and test execution workflows.

QA Tester

March 2024 – February 2025

Updoer Technology — Noida, India

- Tested **B2B, B2C, and CRM platforms** (web + Android/iOS) covering functional, regression, UAT, API, and database scenarios using Postman, MySQL, and JIRA.
- Wrote and maintained test cases and defect reports grounded in functional and business requirements; consolidated **500+ test cases into 250 reusable scenarios**.
- Conducted cross-browser and cross-device compatibility testing; supported defect triaging, retesting, and release validation for production deployments.
- Participated in **Agile (Scrum)** ceremonies — sprint planning, daily stand-ups, and retrospectives — using ClickUp and JIRA for tracking.

TECHNICAL SKILLS

- **Manual Testing:** Functional, Regression, Integration, System, UAT, Exploratory, Cross-browser, Cross-platform
- **Automation:** Selenium, TestNG, Maven, RestAssured, JMeter, Appium, Playwright (exposure)
- **API & Backend:** Postman, API functional testing, API contract testing, MySQL/SQL, DB validation
- **CI/CD & Cloud:** Jenkins, GitHub Actions, AWS
- **Test Management:** JIRA, ClickUp, TestRail, Qase, Git
- **Languages:** Java, Python
- **QA Practices:** STLC, SDLC, Bug Lifecycle, BDD, Page Object Model (POM), Test Strategy

EDUCATION

B.Tech in Computer Science

June 2021 – July 2025

Dr. A.P.J. Abdul Kalam Technical University, India
